RGB-620-R1 Module

Part No. 0000005

About the product

The RGB-621-R1 is a smart RS-485 expansion module designed for precise control of RGB + Tunable White (CCT) LED strips in home automation, commercial lighting, and building control systems. Powered by the RP2350A microcontroller, it communicates via Modbus RTU and integrates seamlessly with MicroPLC or MiniPLC controllers.

With ESPHome support, the module is fully compatible with Home Assistant, enabling advanced lighting scenes, automation, and responsive control.
